

**CSE 5325 – Software Project Management**  
**Project Plan**  
**Fall 2018 - Assignment #2**

**Phase 2 due: Thursday Oct. 18, 2018; 5:00 PM**

**Grading: 10%**

**Submission via: Black Board (<https://elearn.uta.edu/>) – Assignment 02**

**GTA Information:** Mr. Rodrigo Dos Santos

**GTA E-Mail:** [rodrigoaugusto.silvadossantos@mavs.uta.edu](mailto:rodrigoaugusto.silvadossantos@mavs.uta.edu)

GTA E-mail is only for asking questions but not submission of assignment. Submission will be via blackboard.

For your first assignment, you were asked to complete a “Project Scope and Feasibility” document based on the assigned project, i.e. “Personal Health Monitoring System – PHMS”. This assignment will focus on redoing section 6 of your “Project Scope and Feasibility” document using the latest version of Microsoft Project Plan:

- You can register for a 60-day trial version of “Microsoft Project Professional 2016” and use this product to keep track of project tasks (<https://products.office.com/en-us/project/project-professional-desktop-software>). This is a great product and hopefully you will continue using it at your company (all rights reserved for Microsoft) or when you become a manager. If you already have a copy that you can use, no need for the free trial. A quick overview of this product is available at many sites (i.e. search for a tutorial video at YouTube, there are many), an example would be at: [https://www.youtube.com/watch?v=iUqbhkJWt\\_4](https://www.youtube.com/watch?v=iUqbhkJWt_4)
- Please resubmit the “Project Scope and Feasibility” document with the following two changes:
  1. Redo section 6, this time using “Microsoft Project Professional 2016”
  2. Fix any changes that we suggested to other sections after getting back your graded assignment 1

Once again, please note that you will NOT be involved in coding in this class since the focus is Software Project Management.
